
[Automatic Patent Analysis](#)

Experts reckon that much of the technical information contained in patents is not available anywhere else, and that it contains around 80% of the worldwide technical knowledge.

However, patent information analysis is not easy: patent documents are abundant, lengthy and are written in very technical language. Thus, reading and analysing patent documents can be complex and time consuming. This is where the use of Automatic Patent Analysis (APA) can help.

This new fact sheet produced by the European IPR Helpdesk provides some useful tools and explains how to perform an APA, in order for researchers and SME to integrate patent information more easily into their activities.
