
[CIFRA survey on ICT-related patents](#)

Within the framework of the CIFRA project (Challenging the ICT Patent Framework for Responsible Innovation), a project within Horizon 2020 of the European Commission, a survey has been developed to collect the opinions and attitudes of stakeholders involved in or with the ICT sector towards the current patent regime. With this survey, the CIFRA Consortium, whose partners are Fraunhofer-Gesellschaft (DE), Telefónica Investigación y Desarrollo SA (ES), Università Commerciale Luigi Bocconi (IT) and Universidad Carlos III de Madrid (ES), aims to review the issues and possible improvements related to the current framework for ICT patents to promote responsible innovation.

The deadline for answering the survey is the end of July.

To access the survey please click [here](#).
