

What is an IP Audit? ^[1]

Category:

[IP Audit](#) ^[2]

An IP audit is a systematic, thorough and solution-focused review of the intellectual assets owned, used or acquired by the businesses to ascertain their legal status, value, potential IP-related risks and the means for protection and to capitalise on them.

A formal IP audit serves two general purposes: (1) identification and evaluation of IP assets (2) anticipating and managing the risks that could be linked to the IP portfolio of the company.
